Title of Invention

(1) I, Denise Renee Murray, age 41, female and citizen of the United States of America, residing at 1130 Duchow Way #7, Folsom, California, 95630. Home phone 916 983-7237 and work phone 916 961-1785, invented on August 28th, 2001, a product known as the Edge-it.

Statement regarding Federally sponsored research or Development

(1) "Not Applicable"

Reference to sequence listings, a table, or a computer program listing

compact disc appendix

(1) “Not Applicable”

Background of the invention

- (1) The field of endeavor for which the invention pertains is a Utility Patent Application.**
- (2) There are no references to specific documents related to this invention. However, standard fold up table edges, computer desk edges and miscellaneous table edges are known to be rough and uncomfortable. In addition, chemicals used to clean the surfaces irritate the skin of forearms and elbows of the user.**
- (3) This invention slipped over a table's edge is intended to protect users arms from the afore mentioned conditions.**

Brief summary of the invention

- (1) This invention is a U shaped plexiglas channel wrapped with a neoprene pad that slips over the edge of a table to protect the user's arm from rough edges and/or cleaning chemical residue remaining on the table surface.**

Detailed Description of the invention

- (1) This invention is an arm pad that fits on the edge of any standard 3/4" fold up table or 3/4" miscellaneous table.**
- (2) The channel shaped product is designed with a smaller dimension at the opening of the channel to slide on and hold tightly over a table edge.**
- (3) This channel used on the table edge in front of where the user sits, is designed to protect the forearms and elbows from sharp or uncomfortable table edges. This will also protect the user from chemical residue remaining on the table after cleaning.**
- (4) This product will be manufactured out of 3/16" plastic or Plexiglas through injection molding in one U shaped solid piece. Exterior surfaces will be wrapped with a neoprene or similar padding. The padding could be an adhesive backed material, or a separate adhesive may be used to apply the neoprene.**
- (5) The unique features of this product that distinguishes it from other inventions is the size. This product as illustrated on the drawings as a channel 2 1/2" wide by 8" long by 1 5/8" high. Other sizes would be available.**
- (6) Another unique feature that differs from other products is that if and when the neoprene gets soiled or damaged on one side, it can be flipped over to the opposite side.**

(continued)

(7) The primary market for which this product is related to is the Bingo Industry. Due to it's size, it is easy to carry in bingo bags, purses or any small carry bags.

The secondary market is for schools, office or homes.

(8) Another unique feature would be the various amounts of colors the neoprene padding could be marketed with.

(9) This product will also be produced in various lengths or sizes.
